Professional Learning
Facilitated Curriculum Overview

Overview

In this two-hour, synchronous session, you will dive deep into the structure and components of Ellipsis Education curriculum. You'll have guided time to explore the curriculum layout and features. Then, you'll get an interactive tutorial of the coding platforms used in the curriculum. This training is conducted in a virtual, group learning environment and facilitated by an Ellipsis team member.

Learning Outcomes

Teachers will be able to:
- Navigate the Ellipsis Curriculum Delivery Platform to access lessons and course resources.
- Understand the types and features of Ellipsis lesson plans.
- Use third-party coding environments when teaching coding lessons.

Outline

1. Vision building with district and/or building leaders and Ellipsis team members
2. Orientation to curriculum features and additional reference materials
3. Hands-on coding platform tutorials and file management preview

What to Expect

1. Ellipsis team members will give a guided overview of the Curriculum Delivery Platform and coding platforms.
2. Virtual, live discussion covers tips for curriculum implementation and how to prepare for success.
