# Professional Learning Teacher Training Program

#### Overview

This program offers a mix of synchronous and asynchronous training to help you make the most out of your new Ellipsis curriculum. First, you'll participate in a 30 minute, virtual kick-off session with the Ellipsis team to discuss your goals and learn about key features. Next, you will receive access to a self-paced onboarding course. This interactive program covers course navigation, coding platforms, and instructional design.

# Learning Outcomes

Teachers will be able to:

- Confidently access and use Ellipsis Education resources to plan and implement computer science in their classrooms.
- Use third-party coding environments when teaching coding lessons.
- Describe the structure and key characteristics of Ellipsis Education curriculum.
- Situate their computer science implementation within the broader landscape of computer science education.

## Outline

- 1. Welcome
- 2. Getting Started with Ellipsis Education
- 3. Computer Science The Big Picture
- 4. Navigating the Curriculum
- 5. Courses and Coding Platforms
- 6. Instructional Quality and Approach

## What to Expect

- 1. You will develop a personal reflection, which represents your unique learning and application to practice.
- 2. The course concludes with the submission of your reflection guide so that you can download your certificate of completion.
